**\*DEADLINE FOR BANNER AND T-SHIRT LOGOS IS 12/10/24**

# FRC 9150

Founded in 2021, Labyrinth Robotics is a **student-led**, community-based FRC team driven by the mission to make STEM accessible for the youth across our region. As a proud participant in the global FIRST Robotics Competition, we design, build, and program industrial-grade robots to tackle challenges each competition season, all while learning real world engineering, teamwork, and leadership skills.

We are also part of **Morganton Youth Robotics**, a registered **501(c)(3) nonprofit organization**. This allows all sponsorships and donations to be fully tax-deductible, making it easy for businesses to invest in both their community and the future generation.

Our team isn't just about robots it's about making **impact**. Through outreach initiatives, we work year round to inspire younger students and make STEM education more inclusive and engaging.

Since our founding in 2021, Labyrinth Robotics has grown in both size and impact, earning recognition at regional and state competitions, including the **Creative Award** and the **Industrial Design Award**.

Partnering with Labyrinth Robotics means **investing** in the next generation of STEM leaders. Your brand will be **showcased** at competitions, community events, and across our digital platforms.

We're an **award-winning** team recognized for our technical skills, creativity, and design excellence.

All donations are **fully tax-deductible** through our 501(c)(3) **nonprofit**, Morganton Youth Robotics.

Sponsors receive regular updates, visibility, and a lasting connection to our mission.
